

Battery Balancer Management

1S
0-5V

Weight: 100G

PRODUCT FEATURES

FLEXIBILITY AND COMPATIBLE

- Easy to install with simple connection
- can work with BMS or can work independently Can extend the battery life
- can be used for various lithium batteries both cylindrical or prismatic batteries or lead-acid cell or AGM
- No affect to battery pack wiring .no impact to charging and discharging

TYPICAL SPECIFICATION

Item	Rating
Balancing Ah Capacity Limitation	No limitation
Battery Series Limitation	No limitation, Can use in Series for High volt pack
Suitable Battery Type	Universal for Lithium ion/LiFepo4/LTo/super Capacitor batteries/AGM/Acid-cell
Balance Method	Energy Transfer/Dynamic, low consumption No wasted energy from the pack
Lithium Balancer Version	1S(With/without Led Indicator),3,4s,5s,6s,7s,8s,16S
Working /storage Temperature	-40 ~+80/-40~ +100
Online Working	To blance during charge,discharge,storageOnline Working
Dynamic equalizing	To prevent batteries out of balancing all the time
Engery transfer	Transfer energy from higher voltage cell to lower ones
Sharing capacity	Let the power flow from one cell to another and share them among the cells
Maintenance and recovery	To Keep normal batteries at a good condiction ,recover the backwards ones
